

FENNEX

FennexSafe™

AI-DRIVEN
HSEQ PLATFORM

Simplify Safety. Reduce Risk. Strengthen Assurance.

FennexSafe™ brings health, safety, and assurance together in one powerful digital suite reducing administration, minimising risk, and empowering organisations to build a proactive, high-performing safety culture.

INTRODUCING FENNEXSAFE™ AI-DRIVEN HSEQ PLATFORM

Designed to simplify and digitalise critical HSEQ and operational processes - bringing your safety, compliance and risk management workflows into one intelligent system.

Seamless Efficiency for All

From frontline teams to leadership, FennexSafe™ enables fast, consistent reporting and access to real-time insights, reducing effort while improving data quality.

Compliant with Industry Standards

Designed with industry regulations in mind, streamlining compliance and saves time on data collection and report preparation.

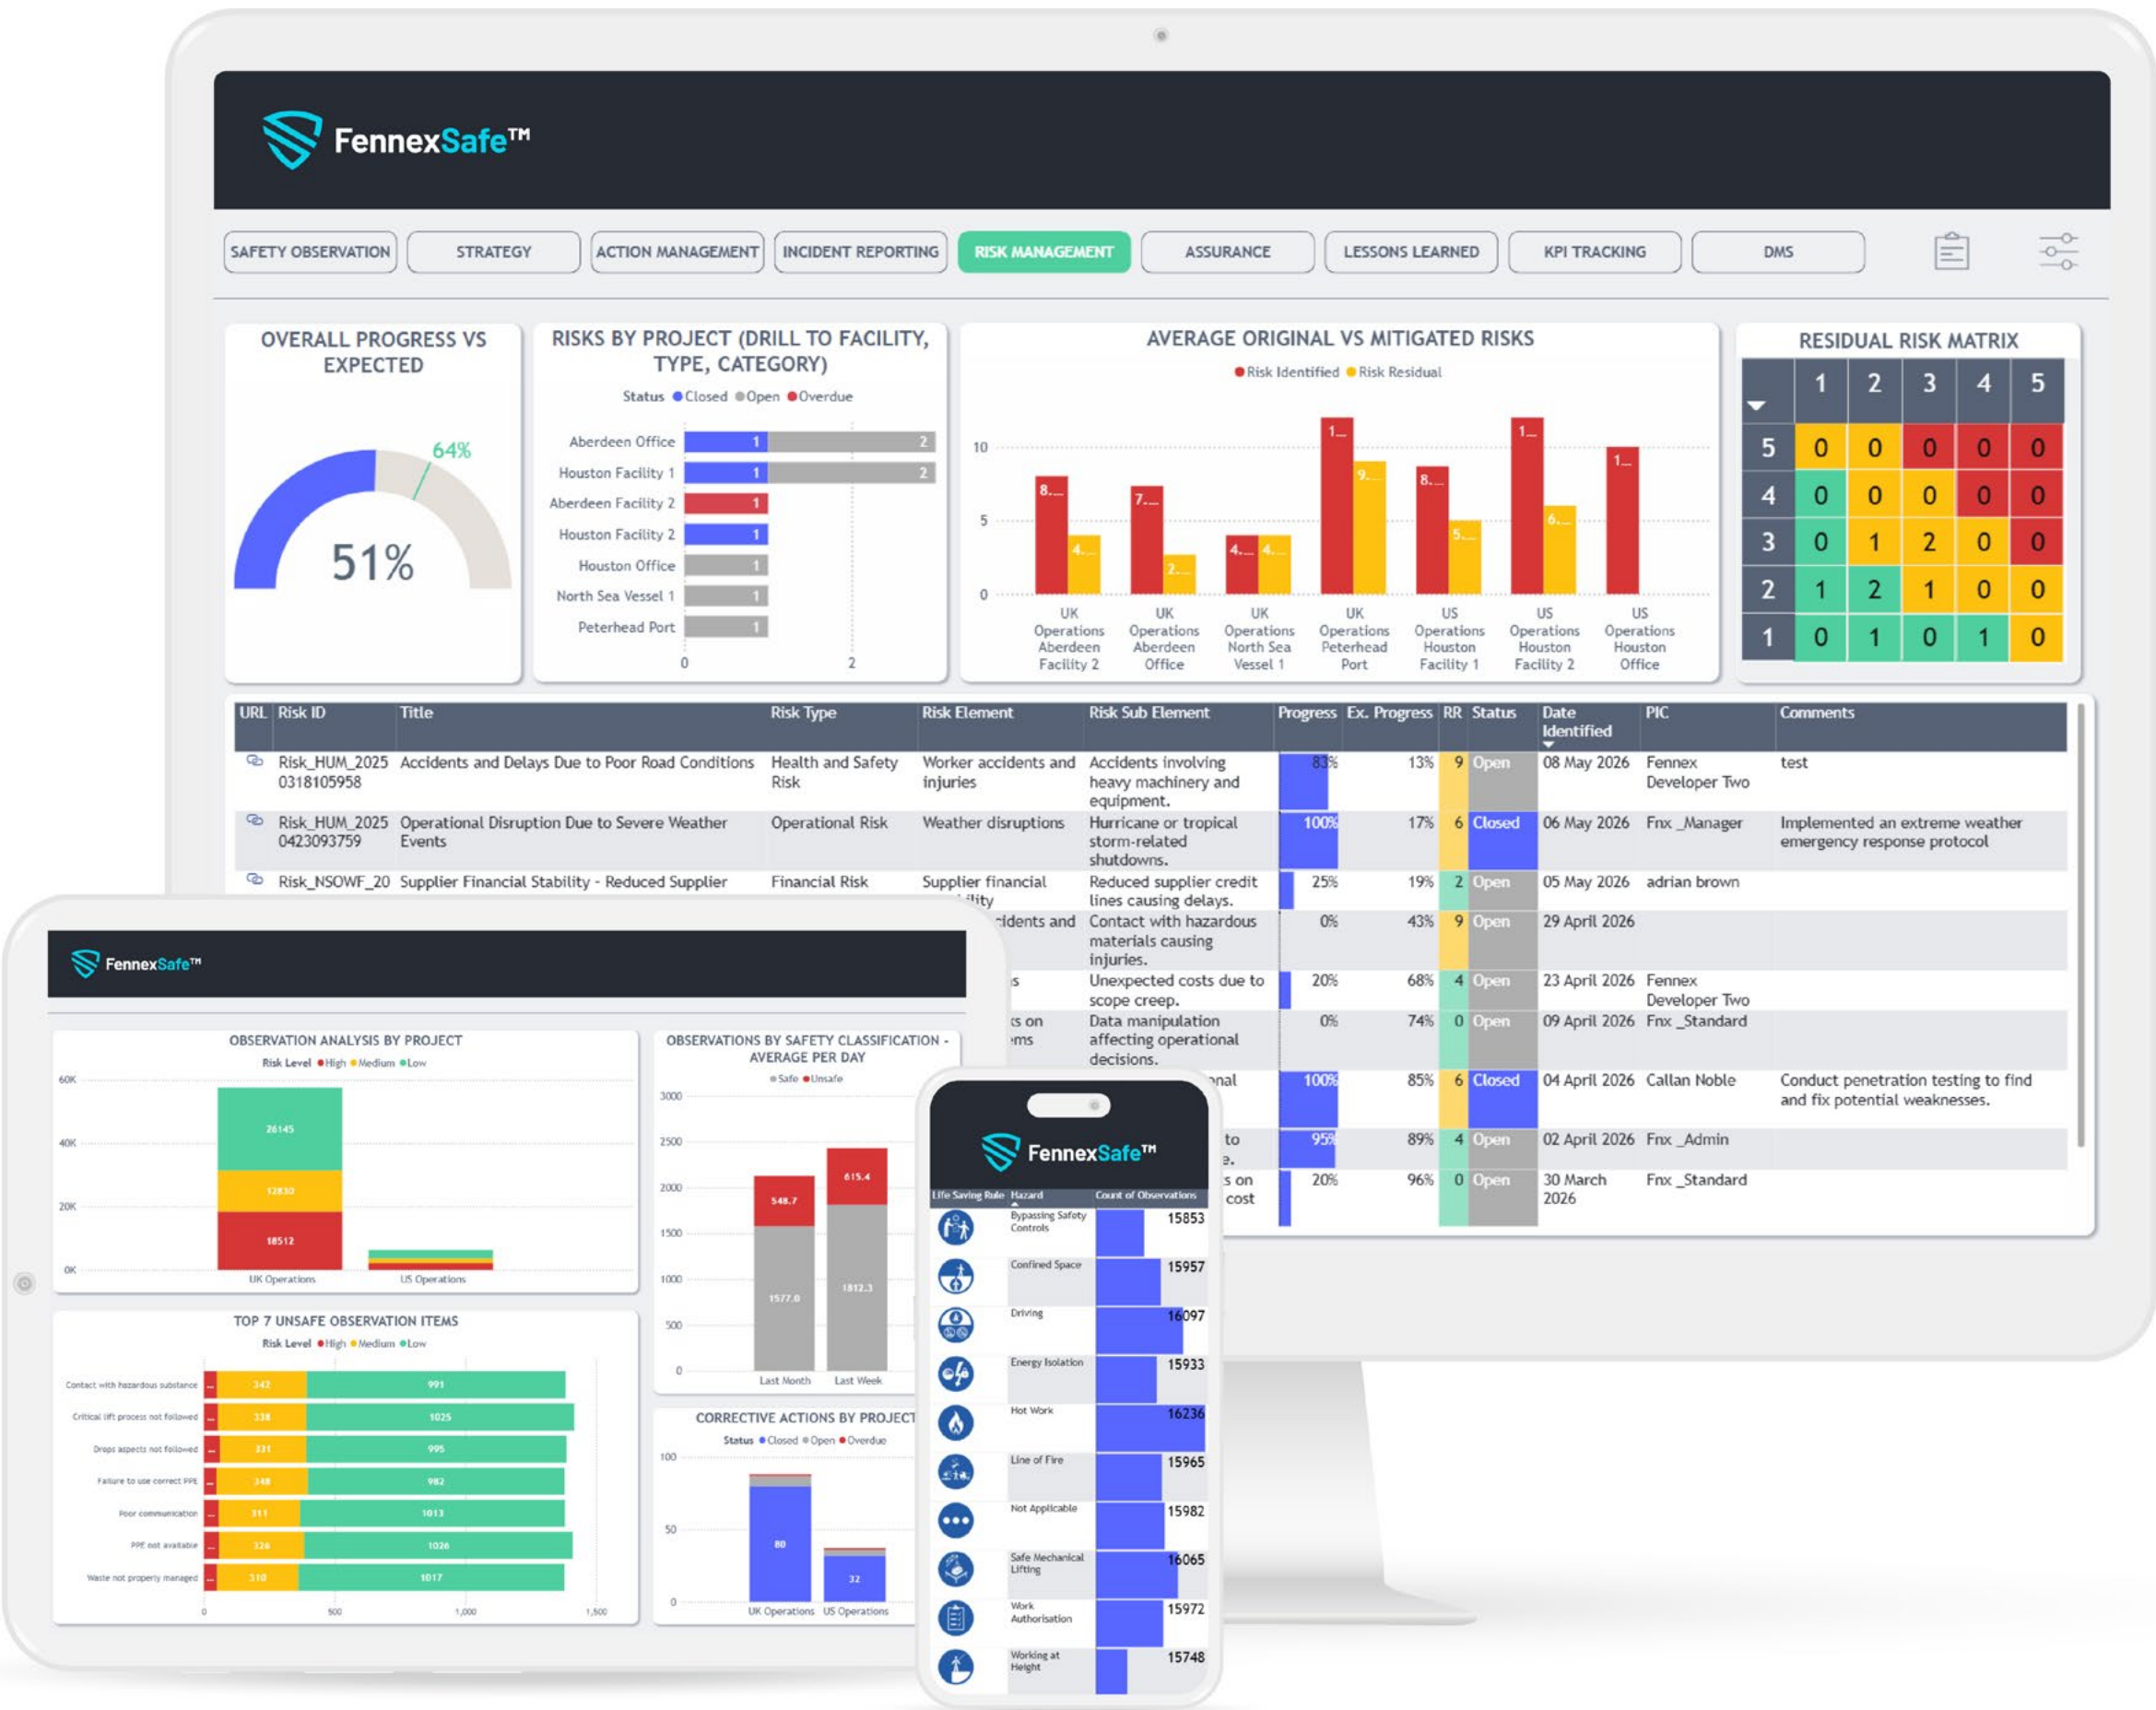

Real-Time Visibility

Intuitive dashboards with real-time insights help teams make quick and informed decisions effectively.

Future-Ready

Engineered to adapt to changing industry needs, harness advanced technologies, and scale for lasting success.

SOLVING THE BIGGEST HSEQ CHALLENGES

DISCONNECTED PROCESSES & SILOED DATA

Organisations often juggle multiple tools for safety, compliance, and operations – leading to inefficiencies, duplication, and missed insights.

Solution

FennexSafe™ unifies safety, compliance, and operational workflows into one cloud-based platform – reducing duplication, breaking down silos, and streamlining communication across teams and assets.

LIMITED SAFETY VISIBILITY ACROSS ASSETS

Without real-time data, leaders can't act quickly on incidents, risk trends, or workforce performance especially in fast moving and high-risk environments.

Solution

With live dashboards, automated reports, and asset-based analytics, FennexSafe™ provides full visibility – enabling data-driven decisions across operations.

INCONSISTENT COMPLIANCE & ASSURANCE EXECUTION

Manual audits, delayed corrective actions, and lack of standardisation make it difficult to meet internal policies and regulatory requirements consistently.

Solution

FennexSafe™ automates assurance workflows, policy reviews, and action tracking – ensuring standardised, audit-ready compliance with nothing missed.

HSEQ MANAGEMENT SUITE:

SAFETY OBSERVATION REPORTING

Capture frontline data with mobile-first tools and unlock predictive insights with built-in AI.

INCIDENT REPORTING

Log, investigate, and resolve incidents with structured workflows and visibility at every stage.

CORRECTIVE ACTIONS TRACKING

Ensure actions are assigned, tracked, and closed – with automated notifications and accountability.

RISK MANAGEMENT

Conduct and monitor risk assessments and mitigation plans in real time to proactively control hazards.

AUDIT & INSPECTIONS

Digitise and enforce standards with scheduled reviews, approvals, and audit-ready documentation.

STRATEGY, GOALS & KPI TRACKING

Align teams with strategic objectives and track performance with live dashboards.

LESSONS LEARNED

Capture insights, drive continuous improvement, and prevent repeated incidents.

TRAINING & COMPETENCY

Manage training, certifications, and competency with automated reminders and compliance tracking.

OPERATIONAL CONTROL SUITE:

DOCUMENT MANAGEMENT

Centralise and track critical operational documentation with version control, approvals, and audit-ready traceability.

MANAGEMENT OF CHANGE

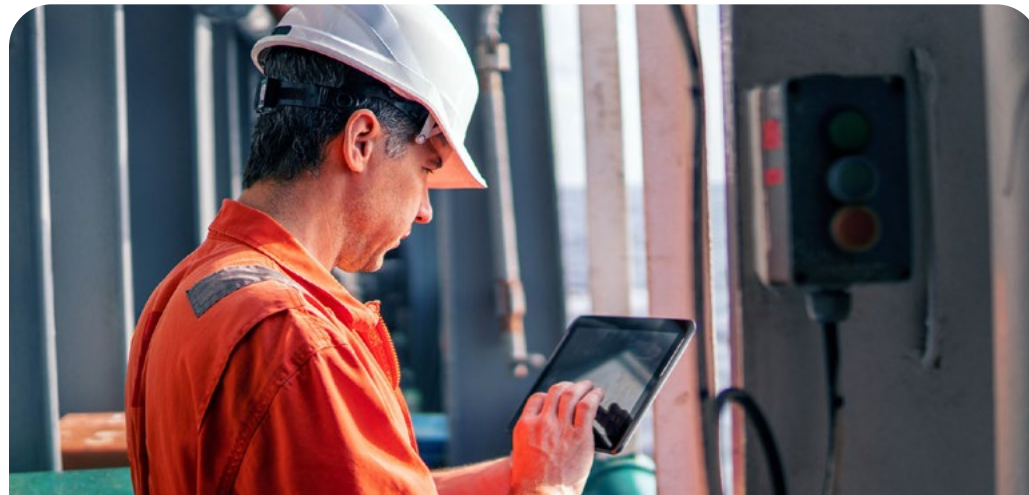

Reduce operational risk by managing organisational, technical, and procedural changes through controlled workflows.

OPERATIONAL GOVERNANCE

Coordinate complex operational workflows through structured tasks, approvals, and stage-gated processes.

TURNING DATA INTO MEASURABLE IMPACT

Safety Observation & AI

Capture data from the field using a mobile-friendly, multilingual app. Enable all workers, regardless of role or location, to contribute to safety, while AI analytics identify patterns, predict risks, and surface insights before incidents occur.

- Open-access app with QR and geo-tagging
- Voice-to-text and photo uploads
- AI-powered analysis and predictive insights

Incident Reporting & Corrective Actions

Log, track, and resolve incidents with built-in investigation workflows. Assign corrective actions, monitor closure status, and generate audit-ready documentation – ensuring nothing falls through the cracks.

- End-to-end incident logging and review
- Action assignment with reminders and tracking
- Root cause analysis and resolution visibility

Risk, Assurance & Compliance Management

Standardise risk assessments and assurance checks across assets. Fennex helps you digitise policy management, enforce compliance schedules, and create live dashboards for internal and regulatory reporting.

- Dynamic risk registers with real-time updates
- Automated policy and assurance workflows
- Dashboard views for performance and compliance

Easy Deployment - Weeks, Not Months

- Rapid deployment, with implementation possible within just a few weeks
- Simple, intuitive interface designed for fast adoption with minimal training
- Modular and industry-built, tailored to your specific workflows and operational requirements
- Fennex manages setup, configuration, and data migration with minimal demand on internal resources
- Ongoing support from the same engineering-led team that develops and evolves the platform

ABOUT FENNEX – SMART DIGITAL SOLUTIONS

Fennex is an innovative cloud tech company based in the UK, established in 2016 by a team of energy industry professionals with over 25 years of global industry experience.

Our company is driven by a passion to accelerate the digital transformation within high risk industries and our focus lies in developing smart, innovative, and cost effective digital solutions that empower teams to enhance safety, compliance, and drive excellence in operations efficiencies.

Our solutions provide our customers with a distinctive advantage, helping them achieve significant cost reductions, improved safety performance, and making substantial progress in reducing their carbon footprint.

Applying Deep Expertise to Human-Led Processes

Leveraging artificial intelligence and machine learning algorithms, Fennex has revolutionised complex workflows in HSE, compliance, policy assurance, extreme weather management, and project management.
